

Thomas J. Parr, M.D., F.A.C.S.

Orthopedic Surgery and Sports Medicine

Routine Care for Total Joint Patients

It is very important that you tell your physician or dentist that you have a Total Joint Replacement, a MAJOplasty partial Joint Replacement, or a Joint Resurfacing several days prior to your receiving any of the following treatments. This is because you may need to be put on an antibiotic treatment beforehand as a preventive for infection.

- * Any Dental Procedure
- * Any Infection
- * Genitourinary Instrumentation
- * Vaginal Exams & GYN Surgery
- * Bronchoscopy
- * Barium Enema
- * Liver Biopsy
- * Dermatology
- * Kidney Surgery
- * Prostate & Bladder Surgery
- * Tonsillectomy
- * Sigmoidoscopy
- * Colonoscopy
- * Eye Surgery

Dr. Parr is a limited liability partner in HOUSTON ORTHOPEDIC & SPINE HOSPITAL
